

Let us create today the systems you will need tomorrow

For more than **55 years**, the French family-run, **LOHR GROUP**, has been a **global specialist in the design, manufacture and marketing of transport systems for goods and people** and 80% of the company's turnover is on the export market.

Today, with a **global manufacturing footprint** including six plants across three continents, **1,350 employees** and a research and development centre with **120 engineers and technicians**, Lohr continues to assert its position as the world leader in car transporters, to develop its piggyback activity and to promote projects for sustainable mobility.

Come and discover our solutions for your operations at the **IAA Transportation trade show in Hanover from 20 to 25 September 2022**. We will be delighted to welcome you at our stand: **Hall 25 Stand B61**.

Come and discover our all-new **PERFORMER 1.46**, our **Eurolohr 253+**, our **Eurolohr 353+**, showcased at our **outdoor stand G43 and G41** as well as our **new TALE range**.

We hope to see you there!

All the LOHR team is looking forward to welcoming you at their stand!

Hannover / Messe GERMANY

Come and discover many new additions designed to help you continue to improve the performance of your business.

Safety, versatility and outstanding performance

LOHR is expanding its range of products, incorporating all the latest innovations to meet the broadest range of needs within the different business sectors of vehicle transportation.

- **New PERFORMER range:** a "traditional" range for all loading requirements. The range has been expanded with a new trailer equipped with two independent stackers.
- **EUROLOHR:** the first fully detachable articulated transportation vehicle, the Eurolohr remains the all-round solution for transport companies, helping them to optimize both their productivity and their profitability.
- **TALE:** the range has been extended with a new trailer equipped with two independent stackers. A range designed primarily for the transportation of caravans, camping-cars and mixed loads.
- **SRTC range:** an all-new range of semi-trailers designed for heavy and special transport loads.
- **MAXILOHR range:** designed for the transportation of all types of heavy vehicles, new trailers, wide-ranging modularity.
- **Confidential SHR range:** a fully closed transport trailer, with a roof that can be raised and hydraulic tailgate.

And we have **every technical solution for your logistics and transport vehicle needs**: transportation of vehicle wreckage, urban distribution (3, 4 or 5 cars only), etc.

Eurolohr 3.53 WXS+ New

Eurolohr 2.53 WXS New

Cristal, a new and modular electric mobility design

Cristal is a new and **economical digital transportation system**. It is an **innovative** mobility solution due to its modularity, offering all the standard features of public transport (access ramp for people with reduced mobility, passenger comfort, safety, etc.).

- 100% electric, it reduces the carbon footprint offering 120 km of autonomy without recharging,
- with its compact design, Cristal provides a spacious interior for a vehicle with the dimensions of a city run-around (4.2 m long, 1.87 m wide) with standing, pavement-level access,
- max. speed: 50 km/hr.,
- slope capacity: 20%,
- rapid charge time: 100% in 2 hours, 50% in 45 minutes,
- Cristal is a solution that can constantly be adapted to passenger levels (convoy of 1 to 4 shuttles) with its automated coupling system

Designed from a "public transport" perspective (useful life of 12 years or 600,000 km), **Cristal offers full complementarity with all mass transport systems** (metro, tram, bus).
